Re: Docket # OST-2004-29077 - 211
2005/2006 U.S.-China Air Services Case and Designations

Dear Secretary Mineta:

It is my understanding that the Department will soon be deciding on an award of new route rights to two U.S. carriers for service between the U.S. and China, one starting March 2005 and a second beginning March 2006. I am writing to indicate my strong support for Continental Airlines' application for the right to inaugurate service between New York/Newark Liberty and China.

Due in large part to the impressive expansion of Continental's Global Gateway in Newark, the number of international destinations served non-stop from Liberty International Airport has risen dramatically over the past few years. With more than 400 daily departures to over 140 nonstop destinations throughout the Americas, Europe and Asia, Continental's strong operation, global connectivity and award-winning customer service have made the carrier the best and most preferred choice for travel in and out of the New York region.

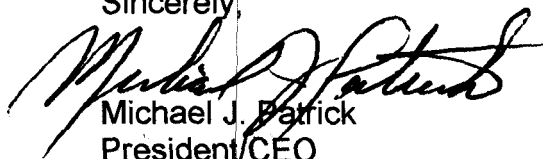

Currently, no service exists between Liberty International Airport and China, and no U.S. carrier serves China from the New York City metropolitan area. No other application before the Department holds as much benefit to the flying public as Continental's proposal to operate daily service between New York/Newark and China – a missing link and key component to Continental's and the region's expansion plans. Continental has proven its ability to serve long-haul Asian markets from Liberty International with successful nonstop service to both Tokyo and Hong Kong. With this legacy of performance, and as the largest airline serving the New York/Newark area, Continental is uniquely qualified to provide consumers with superior service and effective competition in this crucial market.

KELLES^{INC}

When making your decision between the competing applications for new route rights to China, the choice is clear. I urge you to award these frequencies to Continental Airlines, serving Metropolitan New York City, the City of Newark, and the State of New Jersey.

Thank you for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael J. Patrick", written in a cursive style.

RE: 2005/2006 U.S.-China Air Services Case and Designations
(OST-2004-19077)

Dear Secretary Mineta:

As a Continental employee of 27 years, I am writing to urge you to award new route rights (a designation and related frequencies) to Continental Airlines so that Continental may begin service between New York/Newark and China. Service to China is crucial to Continental's plans and a vitally important part of Continental's network.

Increased Continental service at Newark Airport is not only crucial to Continental's plans, but is also an important factor in improving the economy of the entire New York/New Jersey metropolitan area and cities around the country. As there is currently no U.S. carrier service between this region and China, thousands of passenger, shippers, and businesses will benefit from this new service.

No other application before the Department holds as much benefit to the flying public as Continental's proposal to operate daily China service. As the largest airline in the New York area and the only carrier that serves Tokyo and Hong Kong nonstop from the region, Continental is in the unique position of being able to provide consumers effective competition in the crucial China market.

The Department's decision should be an easy one. Continental must be immediately awarded new China rights and I again urge you to provide my airline this crucial opportunity.

Thank you for your consideration.

Sincerely,

Re: 2005/2006 U.S. – China-Air Services Case and Designations (OST-2004-19077)

As a resident of New Jersey conducting business in China, and associate and friend of numerous citizens pursuing business with China, I ask for the following assistance. Please support Continental Airlines desire to secure the new route rights to begin service between Newark Liberty International and China. Service to China is crucial to Continentals plans and a vitally important part of Continentals network.

The desire to fly from Newark, nonstop, to Beijing and Shanghai on Continental becomes even more impressive when speaking to those who currently travel to these destinations in China and share my thoughts. The statements I have heard over and over are that current availability is extremely limited, restrictive and a difficult experience. When discussing Continentals desire to fly from Newark, I see genuine excitement and enthusiastic support and hear the words "Thank You!"

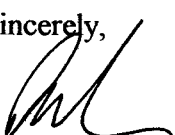

Increased Continental service at Newark Liberty is not only crucial to Continentals plans, but is also an important factor in improving the economy of the entire New York/New Jersey metropolitan area. With no current U.S carrier service between our region and China, thousands of passengers, shippers and business will benefit from this new service.
